Re: KGCA-LP, Tumon, Guam
Facility Identification Number: 133792
Marianas Educational Media Services, Inc.
Special Temporary Authorization

Dear Mr. Kelley:

This is in reference to the request filed June 14, 2007, on behalf of Marianas Educational Media Services, Inc. ("MEMS"). MEMS requests extension of the special temporary authority ("STA") granted on December 18, 2006, to operate Low-power FM Station KGCA-LP with temporary facilities.¹ In support of the request, MEMS states that the process of negotiation and obtaining local permits for use of a new, permanent site is continuing.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has been prevented from restoring licensed operation due to causes beyond its control and has taken all possible steps to expeditiously resolve the problem. Thus, extension of STA is warranted.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station KGCA-LP may

¹ KGCA-LP is licensed for operation on Channel 295L1 (106.9 MHz) with effective radiated power of 0.07 kilowatt (H&V) and antenna height above average terrain of 20 meters.

continue to operate with the following facilities:

Geographic coordinates:	13° 29' 13" N, 144° 45' 50" E (NAD 1927)
Channel	295 (106.9 MHz)
Effective radiated power:	0.07 kilowatt (H&V)
Antenna height:	
above ground:	30 meters
above mean sea level:	80 meters
Above average terrain:	35 meters

MEMS must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. See 47 CFR § 1.1310.

This authority expires on **June 19, 2008**.

Sincerely,

Charles N. Miller, Engineer
